

Course Code	Course Name	Credits
26CS250	INTERNSHIP	2

### **Course Description**

The BCA Internship course provides students with practical industry exposure where they apply their academic knowledge in real work environments. It helps them understand organizational practices, gain hands-on experience, and develop professional skills required in the IT industry.

### **Course Objectives**

- To provide real-world industry experience.
- To apply theoretical knowledge in practical situations.
- To develop technical and professional skills.
- To understand workplace ethics and organizational culture.
- To enhance problem-solving and decision-making abilities.
- To improve communication and teamwork skills.

### **Skill Enhancement Outcomes**

- Practical technical and programming skills.
- Industry-oriented problem-solving ability.
- Communication and interpersonal skills.
- Teamwork and collaboration skills.
- Time management and professional discipline.
- Adaptability to real work environments.

### **Course Content and Execution**

- Internship placement in an organization/company
- Understanding company processes and work culture
- Working on assigned tasks/projects
- Regular reporting and progress tracking
- Internship report preparation
- Final presentation and evaluation

### **Learning Outcome**

After completing the internship, students will gain hands-on industry experience, improve technical and professional skills, and understand real-world work environments. They will be better prepared for careers in the IT industry with enhanced confidence, communication, and practical knowledge.
