

Course Code	Course Name	Credits
26RD889	Field Practicum-II	02

Course Description

A field practicum is an experiential, hands-on course where students are placed in professional settings (like social service agencies, schools, or healthcare facilities) to apply classroom theory to real-world scenarios. Students gain practical skills, professional supervision, and direct experience under the guidance of field experts.

Course Objectives

- The primary objective of a field practicum is to bridge the gap between classroom theory and real-world practice.
- To provide students with hands-on, supervised experience in a professional setting, allowing them to develop practical skills, cultivate ethical standards, and build professional competencies for their future careers.

Skill Enhancement Outcomes

Upon successful completion of this course, the learner will be able to:

- Translating classroom theory into practice by assessing individual, group, or community needs
- Evaluate social development policies, programmes, and indicators in India.
- Assessment of indicators of human/ sustainable development at the community level and plan community development accordingly.
- Identifying, networking, and securing necessary governmental, NGO, or community resources for clients.
- Developing the ability to accept constructive feedback, consult with field instructors, and apply it to professional growth.
- Practicing personal reflection to maintain professional boundaries, ethics, and values even in highly stressful.
- Mastering the art of writing professional case records, reports, and policy briefs.

Course Content and Activities

- Identification of organization
- Plan orientation program
- Continue field visit to agency or community
- Report writing and maintain field work diary
- Assignment and workshop
- Assessment through field work report and viva voce.

Learning Outcome

- Student will develop practice competence as social work practice within the organization, the community as well as the skills of assessment, planning and evaluation, and the professionalism
- Learn how to develop self awareness and self discipline sufficient to enable students to apply their knowledge, values and skills when working with individual, family, community and society level.
